Value Proposition

Data Science graduate with a strong foundation in software development and Salesforce platform through self-paced training and hands-on projects. Proficient in Apex, Lightning Components, Flows, and declarative tools, with a good grasp of OOP concepts and problem-solving. Eager to contribute to building scalable Salesforce solutions in a collaborative, fast-paced environment. Completed multiple Trailhead modules and Superbadges, demonstrating skills in customization, integration, and debugging.

Education

- B. Tech | CSE-Data Science | Avanthi Institute of Engineering and Technology | 2025 | 7.88 CGPA
- Intermediate | Sri Chaitanya Jr. College | 2021 | 9.12 CGPA
- Tenth | Sri Chaitanya School | 2019 | 9.5 CGPA

Technical Proficiencies

- Primary Skills: Salesforce Administration, Apex Programming, SOQL Queries, Salesforce Flows, Object-Oriented Programming (OOP) Concepts, Logic Building, Debugging and Troubleshooting
- Tools & Technologies: Trailhead, Salesforce App Builder, Visualforce, Lightning Experience, VS Code for Salesforce
- Lightning Web Components (LWC), Change Sets, SFDX, Basic CI/CD Concepts, Agile/Scrum Methodology
- Soft Skills: Requirement Analysis, Team Collaboration, Adaptability to Fast-Paced Environments

Projects

Salesforce Custom CRM Application
Developed a custom CRM app for managing customer interactions using Apex classes and triggers to automate lead conversion processes. Implemented Flows for declarative automation and Lightning Components for user interface enhancements. Integrated with external APIs for data synchronization, ensuring scalability. Debugged and optimized code for performance, handling edge cases in SOQL queries.
- Key Technologies: Apex, Lightning Components, Flows, SOQL
- Outcome: Reduced manual data entry by 40% in simulated scenarios; completed as part of Trailhead Superbadge.

E-Commerce Order Management System
Built a Salesforce-based order tracking system using declarative tools like App Builder and custom objects. Added validation rules and approval processes with Flows, and created reports/dashboards for analytics. Incorporated basic integrations with email services and troubleshot issues in sandbox environment.
- Key Technologies: Salesforce Admin Tools, Flows, Custom Objects, Reports
- Outcome: Simulated real-time order processing for 100+ records; enhanced with OOP logic for modular design.

Contact Management App with Integrations
Designed and customized a contact management application using Apex for business logic and Lightning Components for dynamic UI. Used SOQL for data retrieval and implemented debugging techniques to resolve runtime errors. Explored deployment using Change Sets in a dev org.

- Key Technologies: Apex, SOQL, Lightning Components, Change Sets
- Outcome: Achieved seamless data flow between objects; aligned with Salesforce best practices from Trailhead modules.

Internships & Simulations

- AI Intern – AIMER Society | 8 Weeks
- ML Intern – Indian Servers | 8 Weeks
- Data Science Intern – Yhills | 8 Weeks
- Data Science Intern – Prodigy | 4 Weeks
- Job Simulation – TCS | Forage Plat form

Certifications

- Trailhead Badges.
- Infosys Springboard certification in Software Engineering and Agile development.
- Google Cloud Gen AI.
- Data Analytics by Jobaaj Learnings.
- SQL by Oracle.
- Java by Oracle.
